SUMMARY

BTech IT student at KPU (graduating June 2027), Dean's Honour Roll x4. Co-op at Fraser Health Authority automating infrastructure security reporting with Power BI and Ivanti Security Controls. Shipped two live ML/AI apps. Canadian Citizen, no sponsorship required in Canada or the US (TN Visa eligible).

EXPERIENCE

Digital Enablement Co-op Student | *Fraser Health Authority* | *Surrey, BC* *Jun 2026 – Present*

- Automated a monthly infrastructure vulnerability reporting process, previously a fully manual, 1-week effort every month into a self-service Power BI platform across 3,100+ managed servers.
- Built a folder-based ingestion pipeline with dynamic filename parsing and automated Power Query cleaning (blank/footer rows, repeated headers) from combined monthly workbooks.
- Implemented Role-Level Security with dynamic user-to-asset mapping so each application owner sees only their own data, eliminating manual report distribution.
- Designed executive and operational dashboards (trends, severity, aging, machine/asset views) with a supporting data dictionary and runbook; fully built and self-tested, rollout in progress.

Office Administrator | *Nexgen Electrical Ltd.* | *White Rock, BC* *Mar 2025 – Present | Part-time*

- Processing \$800K–\$1.2M/month in invoices, SOVs, and POs across a \$15–20M active project portfolio; managing payroll for 30+ employees in QuickBooks.

PROJECTS

Sentinel AI — Autonomous ML Web Firewall 2026

Python | Scikit-Learn | FastAPI | PostgreSQL | TF-IDF | JUnit 5 | [Live Demo](#) | [GitHub](#)

- 92% accuracy, 0 false negatives on all critical-severity cases across SQL injection, XSS, and OS command injection.
- Random Forest trained on 24,161 labeled payloads with character-level TF-IDF n-gram vectorization (n=1–4, 80K features); detects mixed-case obfuscation at confidence 1.00.
- Deployed as FastAPI + PostgreSQL multi-tenant API with SDKs in PHP, JS, and Python; real-time IP blacklisting with zero manual intervention.

Spending Spotlight — AI Bank Statement Analyzer 2025

React | OpenAI API | Python | Flask | Vercel | [Live Demo](#)

- Full-stack app: PDF upload → OpenAI classification → unexpected spend flagged against user-defined categories. Diagnosed and eliminated Chase statement noise injection via custom pattern filtering. Live on Vercel.
- Every request screened live by Sentinel AI (custom-built ML firewall) before processing.

TransLink Transit Intelligence Pipeline

2026 / In Progress

PostgreSQL | Flask | Chart.js | GTFS | K-Means (stretch) | Technical Lead | [GitHub](#)

- Technical Lead on a KPU capstone team; designed a two-layer PostgreSQL schema (raw staging + curated), full ERD, and a four-view dashboard (Network Overview, Route Analyser, Stop Deep-Dive, Comparison Tool).
- Validated schema against full production GTFS data: 242 routes, 63,250 weekly trips, 1.85M+ stop-time records. Design phase complete with an A+ (INFO 4190); implementation begins Sep–Dec 2026 (INFO 4290).

SKILLS

Data & Analytics: Microsoft Power Platform | Power BI | Power Automate | Tableau | PostgreSQL | MySQL | SQLite | ERD & Relational Design | Data Visualization

AI / ML: Random Forest | TF-IDF Vectorization | OpenAI API | Prompt Engineering | Scikit-Learn | Pandas | NLTK

Languages: Python | JavaScript (React) | SQL | PHP | Java | HTML / CSS | C#

Tools & Concepts: FastAPI | Flask | React | Git | Vercel | QuickBooks | Agile/Scrum | SDLC | REST APIs

EDUCATION

Bachelor of Technology — Information Technology

Expected June 2027

Kwantlen Polytechnic University | Surrey, BC | GPA: 3.43 / 4.33 | Dean's Honour Roll x4 (Fall 2024, Summer 2025, Fall 2025, Spring 2026)

Relevant: Project Integration 1 (A+) | Data Warehousing & Mining (A) | Advanced Web App Dev (A+) | Search Engine Principles (A–) | SQA (A–) | Mobile Programming (A+) | Project Management (A–) | OO Software Engineering | Database Systems | Statistics

Diploma — Computer Information Systems

2021

Kwantlen Polytechnic University | Surrey, BC
