Education

Bachelor of Information Technology

Kwantlen Polytechnic University, Surrey, BC

GPA: 3.33 | Expected Graduation: 2027

Dean's Honour Roll (Fall 2024, Summer 2025, Fall 2025)

Diploma in Computer Information Systems | KPU | Completed 2021

Certifications:

- Google Digital Marketing & E-commerce
- Financial Accounting & Fundamentals

Technical Projects

- **Spending Spotlight, AI Bank Statement Analyzer (2025)**
Web app that analyses bank statements, classifies transactions, flags anomalies and visualizes spending via OpenAI APIs. (JavaScript · React · AI API)
- **AI-Powered Text-to-SQL Query Generator (2025, KPU)**
Jupyter Notebook prototype converting natural-language questions into SQL queries using GPT-style APIs, aimed at non-technical users exploring relational databases. (Python · SQL · Jupyter · AI API)
- **Catering Management System (2025, KPU)**
Full-stack PHP/MySQL system with separate portals for admin, staff and customers; I am leading the backend and database development. (PHP · MySQL · XAMPP)
- **Parking Meter Database Project (2020, KPU)**
Relational database system for parking violations including ERD, schema design, and report/clean-up queries. (SQL · ERD · Relational design)

- **Stock Management Website Prototype (2025, KPU)**
Stock (Shares)-management full-stack prototype with secure login and structured data flows; I contributed to database logic and flows. (HTML · CSS · JavaScript · MySQL)
- **Shape-Catching and Color-Catching Game for Kids (2025, KPU)**
Small educational game built in Processing where children catch falling shapes and then sort the caught shapes by different colours — designed to make colour and shape recognition more fun and interactive. (Processing · Java)
- **Postomatic Pro: AI Social Media Automation (In development)**
Tool for small businesses and freelancers to connect accounts, set preferences and let AI generate and schedule posts automatically. (Concept · Prompt design · Automation)
- **MyProjectNest: Academic Project Hub (In development)**
SaaS concept for students to store/share academic projects, with QR-code sharing and AI-powered indexing for fast search. (UX · Information architecture)
- **Online Order Management System (2021, KPU)** Early e-commerce style order/inventory tracking system built with HTML/CSS/PHP + MySQL back-end. (PHP · MySQL)
